Our Whistleblower System

Complying with statutory regulations and internal rules, and the principles laid down in the Code of Conduct at ŠKODA AUTO Group and the Code of Conduct for Business Partners, has top priority at ŠKODA AUTO. It is important to learn of potential employee or supplier misconduct and to put a stop to it. Therefore, we entrusted the Central Investigation Office of the Volkswagen Group to operate an independent, impartial and confidential Whistleblower System on our behalf. Based on the principle of procedural fairness, the Whistleblower System guarantees the greatest possible protection for whistleblowers, persons implicated and employees contributing to the investigation of reported misconduct.

If your report concerns potential serious violations with regards to human rights and environment by suppliers, the Investigation Office will inform the responsible departments, who will process the issue accordingly.

Making a report to our Whistleblower System

The Whistleblower System offers various channels to report potential employee and supplier misconduct that allow a swift review and reaction by our company if necessary. Reports can be made 24/7 in every language.
